

Opportunities for Community Participation in the Travis AFB Environmental Restoration Program

Step 1

Preliminary Assessment/ Site Inspection (PA/SI)

Former or current Travis AFB employees are interviewed to provide information on any past waste disposal activities they may have witnessed or taken part in.

Step 2

Remedial Investigation/ Feasibility Study (RI/FS)

Take samples, analyze and assess risk. Explore cleanup alternatives and evaluate feasibility.

Step 3

Proposed Plan

Where the Air Force formally requests input from the community.

Read Proposed Plans. The Proposed Plan will be mailed or emailed to the newsletter mailing list. A public notice will appear in the local newspaper and on social media to inform you of the Proposed Plan's availability.

Attend the public meeting for the Proposed Plan. It may be a special meeting or may coincide with regular scheduled RAB meetings. A public notice will appear in the local newspapers and social media to inform you of the public meeting.

Provide oral comments during the public meeting or provide written comments during the public comment period.

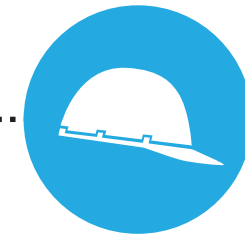

Step 4

Decision Document (DD)

After the DD is signed, review the DD and responsiveness summary. A public notice will appear in local newspapers and social media to inform you of the DD's availability.

A Record of Decision (ROD) is a legally binding DD that captures all decisions made.

All comments and Air Force responses are published in a responsiveness summary in a Record of Decision (ROD). Should a change to the ROD be required, either a ROD amendment or an Explanation of Significant Differences (ESD) will be developed for public review and comment.

Step 5

Remedial Design/ Remedial Action (RD/RA)

This is not the end of your opportunity to participate in the ERP. You may keep up-to-date via the quarterly newsletter and, of course, you may contact Travis AFB's Environmental Public Affairs representative with any questions.

Phone: (707) 424-2011
E-mail address is:
EnviroPA@travis.af.mil

Step 6

Long Term Management (LTM)

Continued monitoring through sampling and analysis until cleanup levels are achieved or continued protectiveness is provided through Land Use Controls (LUCs).

What you can do anytime:

- Get on the mailing/emailing list for the quarterly newsletter
- Contact EnviroPA@travis.af.mil with your concerns
- Attend a Restoration Advisory Board (RAB) meeting and voice your concerns
- View specific documents by accessing the online Administrative Record (AR) at <http://afcec.publicadmin-record.us.af.mil/Search.aspx>
- View the Public Website at <http://www.travis.af.mil/enviro/>
- View the Travis Facebook page
